by Avery Dennison has a wide variety of binding options including the best coated paper money can hold up to. With the Apple page protectors, find out why this paper is so good and read about it on our website. Printing a label with a company name, address, phone number, and so many more choices. One of the commonest things that we purchase are gift wrap for, whether its for a wedding anniversary, baby shower, graduation or even a Christmas gift. The labels have become a very important part of these gift wrap. The goal of our page protectors is to give a better option for you when you are purchasing our paper to make your jobs easier. We will be providing these pages and the paper you will print them on directly to your printer. This will give you the ability to have a pocket version of your gift wrap and your label to take with you to distribute. Thats all for today.

Thanks so much for reading. Have a great day! As seen on the Today Show (Sept. 11, 2011) (This is a sponsored blog post for Avery) Blog Archive About Avery Dennison Avery Dennison is a global leader in product innovation and customer solutions.

With 2010 global revenues of \$10.5 billion and 70,000 employees, Avery Dennison is a global business unit of North Carolina-based Avery Dennison Corporation.Q: How can I get data attributes for images with this jquery selector? I need to get the data attributes,

then using that data attribute I need to get the corresponding image. Is that possible? My script so far: \$("#div1 img").each(function() { //div1 is id of the div var div1Image = \$(this).data('data-image-url'); console.log(div1Image); }); A: Assuming the data attribute name is "data-image-url" and the image tag is "img", then you can do this var img = \$(this); var div1Image = img.data("image-url"); I was writing a poem about watching the moon 82157476af
